## CHAPTER 1

<b>Feline Practice Tips &amp; Senior Health Care Programs</b> .....	<b>1</b>
Mature, senior & geriatric Care Program Overview .....	3
MATURE: Cats aged 7-10 years.....	3
SENIOR: Cats 10-14 years of age.....	4
GERIATRIC: Cats aged 14+ years .....	4
The nuts and bolts of senior/geriatric check-ups .....	5
Weight and Condition Scores .....	5
Physical Examination .....	6
Blood Pressure Determination.....	8
Maximising Urinalysis In-House .....	9
Blood Sampling in Cats.....	10
Behaviour Changes with Age.....	11
Senior Monitoring Cards .....	12
Compounding Medications .....	13
Senior cat Anaesthesia.....	14
The Use of Non-Cuffed Endotracheal Tubes in Cats .....	15

## CHAPTER 2

<b>Feline Chronic Kidney Disease</b> .....	<b>19</b>
Diagnosis .....	19
Creatinine .....	19
Production.....	19
Clearance .....	19
Laboratory issues.....	20
Urine specific gravity .....	21
Study observations.....	21
Bottom line .....	22
International renal interest society.....	22
Treatment.....	23
Diet .....	23
ACE inhibitors.....	23
Hypertension.....	23
Prognosis .....	24

## CHAPTER 3

<b>Feline Diabetes: Where are we up to today?</b> .....	<b>27</b>
Classification of Feline diabetes.....	27
Pathophysiology: “DIABESITY”?.....	28
Glucose & Lipid toxicity: Beta Cell “burnout” .....	29

Clinical signs & Diagnosis .....	30
Treating Feline diabetes – The uncomplicated new diabetic .....	31
Oral Hypoglycaemics: Glipizide .....	31
Diet: High Protein + Low Carbohydrates.....	31
Weight Loss & Physical Activity .....	32
Insulin Therapy: Glargine.....	32
Adjusting Insulin Doses .....	34
Choice of Glucometers .....	36
Continuous Glucose Monitoring Systems (CGMS) .....	36
Home Monitoring .....	37
Achieving Diabetic Remission .....	38
Diabetic Ketoacidosis (DKA) & Hyperosmolar hyperglycaemic Syndrome (HHS) .....	38
Overview of DKA/HHS Management – 5 KEY POINTS .....	40
Feline Acromegaly – an underdiagnosed cause of diabetes??.....	42
<b>CHAPTER 4</b>	
<b>Hyperthyroidism, Hyperparathyroidism and Ventral Cervical Nodules .....</b>	<b>45</b>
General considerations .....	45
Diagnosis .....	46
Treatment.....	47
Thyroidectomy .....	49
Long term carbimazole therapy .....	50
<b>CHAPTER 5</b>	
<b>Controversies in Feline Nutrition.....</b>	<b>53</b>
How cats have been fed in Australia .....	53
Re-emergence of the view that ‘natural’ foods are necessary .....	55
The increasing role of multinational manufacturers in nutritional research.....	56
Teleology and “big cats” .....	57
Recommendations for feeding cats.....	58
<b>CHAPTER 6</b>	
<b>Inflammatory Bowel Disease and Small Cell Lymphoma in Cats .....</b>	<b>61</b>
Introduction .....	61
Histological Classification.....	61
Aetiology .....	62
Clinical features.....	62
Diagnosis of IBD .....	63
Further Diagnostics .....	66
Treatment / management of IBD.....	68
Immunosuppressive Drug Therapy .....	69
Other Modalities .....	71
Small Cell Alimentary lymphoma.....	71
Prognosis .....	72

## **CHAPTER 7**

<b>Feline Osteoarthritis: Overview of Diagnosis and Management .....</b>	<b>75</b>
Clinical signs of feline osteoarthritis .....	76
Diagnosis .....	79
Treating & Managing feline osteoarthritis .....	81
1. Lifestyle & home changes .....	81
2. Chondroprotectants.....	81
3. Non-Steroidal Anti-inflammatory Drugs - NSAID's .....	82
4. Corticosteroids.....	86
5. Opioids .....	86
6. Others .....	87
7. Physical & Adjunctive therapies .....	87
8. Surgical Treatment .....	87
Multi-Modal Analgesic Approach.....	88
Summary.....	88
 <b>SUPPLEMENTARY NOTES.....</b>	 <b>93</b>
