

Distance Education

Beef Production Medicine

Add-value to your services by using evidence based approaches to cattle medicine and production problems that increase your client's bottom line.

By appreciating the implications of individual animal diagnoses for herd health, critically evaluating disease management practices and assessing the financial effects of disease management recommendations, you can improve your client's bottom line.

Develop a systematic, evidence-based approach to dyspnoea, ill-thrift, reduced weaning rates, gait abnormalities and sudden death and use epidemiological and financial analytical tools to evaluate the efficacy and cost-effectiveness of control measures. You'll become indispensable to your clients.

Past Participant

Outstanding tutor who helped me whenever needed.

Clayton Knight, QLD

309 CPD Points

Course dates

1 February – 30 November 2019
10 Modules | Delivered online

Workshop

3-Day workshop
Date TBC

Tutor

Paul Cusack
BSc BVSc (Hons) MVSt MAgribus
PhD MACVSc

About the course

Learning outcomes

On completion of this course, participants will:

- ✗ Be able to describe the principles of herd health to colleagues and clients
- ✗ Develop the skills to work-up common primary presenting complaints in individual animals and herds
- ✗ Be able to use epidemiological tools to assess the impact of disease, as well as interventional and management strategies, on herd health
- ✗ Develop your ability to evaluate the cost-effectiveness of preventative and control measures
- ✗ Develop an evidence-based approach to disease management practices
- ✗ Understand the pace of change in beef cattle medicine and know where to source the latest information and protocols.

Pay as you learn

Choosing your DE course is a big commitment, so there's no need to add further stress by paying your course up front. **To pay as you learn, you will need a \$1,000 deposit to secure your place, followed by 50% of the total course fee 10 days prior to course commencement date.**

We'll arrange simple monthly direct debits from your credit card over 3 or 6 months.

Note: Payment Plan will incur an additional \$250 administration fee, and Early Bird rates do not apply if you choose the payment plan option.

Modules

1. Epidemiology and Ag Economics
2. Dyspnoea
3. Ill Thrift 1
4. Ill Thrift 2
5. Ill Thrift 3
6. Failure to Wean a Calf 1
7. Failure to Wean a Calf 2
8. Failure to Wean a Calf 3
9. Gait Abnormalities
10. Sudden Death

Workshop

Round off the course and see real cases that will help you put into practice the knowledge you have gained.

- ▶ Develop an evidence-based approach to cattle medicine and production problems and add value to the services you can offer your clients.
- ▶ Develop an evidence-based approach to cattle medicine and production problems and add value to the services you can offer your clients.
- ▶ Pursue your passion and develop your career by immersing yourself in an in-depth learning program that will challenge and change your practice.
- ▶ Learning is more than just accessing information. Develop your understanding, skills and abilities by combining the latest evidence-based information with individual feedback and mentoring from your tutor, a leading veterinary expert.
- ▶ Flexibility – online access to your course materials means that you can study anywhere and at any time.

Paul Cusack

BSc BVSc (Hons) MVSt MAgribus
PhD MACVSc

Paul is a consultant cattle veterinarian, ruminant nutritionist, and beef producer with post-

graduate training in the intensive and extensive ruminant industries. His post-graduate training covers the disciplines of nutrition, health programs, reproduction, epidemiology, production and financial management and meat science. He completed his PhD on the interaction between nutrition and health in feedlot cattle in 2007. Over the last 15 years Paul has held various positions within the livestock and veterinary industry. Paul has lectured at Queensland, Sydney and at Charles Sturt University from 2007, where he is an adjunct Associate Professor. He also serves as Head Examiner in Beef Cattle Medicine and Production for the Australian College of Veterinary Scientists. He is currently the director of Australian Livestock Production Services, which consults on intensive and extensive cattle and lamb enterprises throughout the eastern states of Australia, as well as being owner/manager of a cattle trading enterprise. He is has written two distance education courses for the CVE, the long running Ruminant Nutrition course and this more recent Beef Production Medicine course.
